

QUALITY POLICY

It is the intention of AE Aerospace Ltd to be the preferred partner of our customers and associates by providing competitive advantage to them through performance, service and the conformance to specifications of our products,

ordinated contributions from all functions within our organisation.

Our people are important to our success. They shall be selected against criteria for the job and shall be provided with the necessary training and environment in which to perform to the highest standards. They shall be encouraged to develop their skills and roles in the company and to contribute to improving its prosperity.

We shall plan to achieve the appropriate standards of Quality and develop, maintain and review SMART objectives, as defined in the Business Plan. While seeking to improve we shall maintain the disciplines of adherence to our Quality Management System and maintenance of records to ensure and assure reliability of performance.

Our aim is the continuing improvement of our operations through effective use of the Quality Management System, which shall meet the requirements of the appropriate revision of AS9100. The Quality Management System shall be maintained and developed by the company.
